PROFILE SUMMARY

Results-driven Electronics and Communication Engineering graduate with hands-on experience in **Python Full Stack Development, Embedded Systems, and Data Analysis**. Built and deployed responsive web applications using **Python, ReactJS, SQL, and JavaScript**, and developed real-time hardware-based systems using **Arduino and microcontrollers**. Strong foundation in problem-solving, OOP concepts, and database design. Seeking an entry-level Software Developer / Full Stack Developer role to contribute technical expertise and deliver scalable solutions.

EDUCATION

COURSE	YEAR	INSTITUTE / COLLEGE	CGPA
B.E. in Electronics and Communication Eng.	2021 - 2025	Matrusri Engineering College, Saidabad	7.7
Intermediate (MPC)	2019 - 2021	Siddartha Adarsha Junior College, Medak	7.2
SSC	2018 - 2019	ZPHS, Malthummeda, Nagireddypet, Kamareddy	9.7

TECHNICAL SKILLS

Programming Languages: Python, C, JavaScript
Web Technologies: HTML5, CSS3, Responsive Design
Backend & Database: SQL, MySQL, OOP Concepts
Tools & Platforms: Git, GitHub, VS Code, Excel
Embedded Systems: Arduino, MATLAB, Vivado, AutoCAD
Core Competencies: Problem Solving, Analytical Thinking, Debugging, System Design, Collaboration

PROJECTS

Earthquake Detection System using Arduino

- Designed and developed a **real-time seismic activity monitoring system** using Arduino and vibration sensors.
- Implemented an **instant alert mechanism** to detect abnormal ground motion and trigger notifications.
- Improved detection responsiveness by optimizing sensor threshold calibration.
- Conducted multiple test simulations to validate system accuracy and reliability.
- **Technologies:** Arduino, C/C++, Sensors, Embedded Programming

Mechatronic Design and Robust Control of Artificial Ventilator

Jan 2025 – May 2025

- Contributed to the design and development of a **microcontroller-based ventilator prototype**.
- Programmed control logic for airflow regulation and pressure monitoring.
- Enhanced system stability through robust component selection and calibration.
- Collaborated in testing and troubleshooting to ensure reliable operation under varying conditions.
- **Technologies:** Arduino, Microcontrollers, Control Systems, Embedded C

INTERNSHIPS

Embedded Systems Developer Intern – EduSkills (Virtual) *Apr 2024 – Jun 2024*

- Programmed microcontrollers using C/C++ for sensor-based applications.
- Integrated hardware components and conducted PCB testing.
- Debugged embedded systems to improve performance and stability.
- Gained hands-on experience in real-time system troubleshooting.

FPGA / Chip Design Intern – Indian Society for VLSI Education *May 2024 – Jun 2024*

- Worked on FPGA-based digital system design using simulation tools.
- Implemented basic logic designs and verified outputs through testing.
- Strengthened understanding of VLSI architecture and hardware description concepts.

Data Analyst Intern – Elevate Labs *Apr 2025 – May 2025*

- Performed **data cleaning, transformation, and exploratory data analysis** using Excel and Python.
- Developed dashboards and visual reports using Power BI to support business decision-making.
- Automated repetitive data processing tasks, reducing manual effort.
- Generated actionable insights through trend analysis and visualization.
- **Tools:** Excel, Python, Power BI

DECLARATION

I hereby declare that the above information is true to the best of my knowledge and belief.
Place: Hyderabad
